STUDENT ISOLATION FORM

(Developed in conjunction with the Madera County Department of Public Health, Madera County Superintendent of Schools, and the Madera County Schools Reopening Task Force; June 2020) (Revised: 6.18.2020)

Use this for any student(s) who exhibits COVID-like symptoms in class or anywhere on campus during school hours of operation.

Date: _____

Teacher Name: _____

Student Name: _____

Teachers should answer the following questions in order to identify students or staff in close contact with the COVID-like symptomatic student:

1. Who are those students who were within 6 feet of the case for longer than ten minutes?
2. Did the symptomatic student come in close contact with the entire class?
3. Did the symptomatic students share equipment (laptops, lab equipment) that needs to be decontaminated?

Front office personnel should answer the following questions once the symptomatic student reaches the office:

1. Was the symptomatic student on the bus?
2. What “common areas” around campus did the symptomatic student visit during the school day?

Notes:

- Notify local health officials, staff, and families immediately of any possible case of COVID-19 while maintaining confidentiality consistent with the Americans with Disabilities Act (ADA) and other applicable federal and state privacy laws.
- Inform (either school or County Health Department) those who have had close contact with a person diagnosed with COVID-19 to stay home and self- monitor for symptoms, and to follow CDC guidance if symptoms develop. If a person does not have symptoms, follow appropriate CDC guidance for home quarantine.
- Advise sick staff members or children not to return until they have met CDC criteria to discontinue home isolation. If a person with symptoms is tested for COVID and tests negative, they do not have COVID and can follow the school’s standard guidelines for a child with a febrile illness.
